**nin·tid·bit *n.* A choice morsel of information regarding
Nintendo**

The million-selling Nintendo GameCube™ accessory, the WaveBird™ Wireless Controller has just gone platinum. Literally. Beginning November 17, the Platinum WaveBird Wireless Controller will add some winter “bling” to an “iced-out” pad.

The WaveBird Wireless Controller uses revolutionary RF technology that allows people to play Nintendo GameCube from anywhere in the room, without wires and without having to be directly in front of an infrared receiver. Up to four controllers can be used at one time, for up to 100 hours on just two AA batteries. The Platinum WaveBird Wireless Controller has a suggested retail price of \$34.99.
